

THAKUR SAMEER SHETTY TAMMANA

UI/UX Designer • Full Stack Developer

+91 90304 01967 • thakurst5002810@gmail.com • [linkedin.com/in/thakur-sameer-shetty-tammana/](https://www.linkedin.com/in/thakur-sameer-shetty-tammana/)

Education

Gayatri Vidya Parishad College for Degree & P.G. Courses

Bachelor of Technology in Computer Science (CGPA 8.54/10)

August 2023 – June 2026

Andhra Pradesh, India

Government Polytechnic Visakhapatnam

Electrical & Electronics Engineering (Grade 80%)

March 2020 – May 2023

Andhra Pradesh, India

Experience

Spotmies LLP – UI/UX Designer (Expanded into Full Stack Development) | Jan 2026 – Current

- **Role Expansion:** Initially hired for UI/UX Design role but proactively expanded the scope to lead full-cycle full stack development and engineering of multiple key applications/platforms in the company.
- **End to End Delivery of Application (raobahadur.in):** Developed a ready to use, full stack web application in a fast, agile manner. I had complete ownership of the entire product development process starting from the design till the backend optimizations.
- **Rapid Mobile Engineering (Mutiny Talent):** Designed the full UI/UX process flow and architecture of a mobile app from scratch, developing a highly polished frontend application in React Native with an emphasis on efficient state management and UI design.
- **Web Development - Next.js Framework (Spotmies / Amerox.io):** Developed and shipped top-notch web experiences for Spotmies, Amerox.io and MyBodyQode (Beta) using Next.js including all micro-interactions which seamlessly scale on all platforms.
- **Immersive Virtual Environments (Roblox Peddi Game):** Managed the entire lifecycle of product development for a unique immersive gaming experience. Successfully created the complete virtual environment based on the basic game mechanics.
- **UI/UX Strategy (TMN/Satara News):** Created minimalistic design strategy for a multi-lingual platform with highly polished micro-interactions directly guiding the development team on how to implement those in code.

Projects

Project SamudraGupt-Q | Lead Designer & Developer (Three.js, IBM Qiskit)

- Engineered a high-fidelity 3D web interface to visualize a quantum-resistant security framework for autonomous drone swarms, creatively transforming mobile devices into live, interactive drone nodes.
- Translated complex backend states—including E91 QKD quantum key exchanges, Homomorphic Encryption, and an AI threat-detection agent—into fluid frontend micro-interactions with ultra-low latency (210ms).

AI-Powered Personal Gym Trainer | Lead Developer (Python, OpenCV, MediaPipe, Flask)

- Built a real-time computer vision application that processes live video feeds to accurately track user movements. Engineered the system to continuously calculate bicep curl repetitions and stream data through a custom Flask backend.

Immersive Spatial UI (Gesture Shop & Aura Player) | Frontend Engineer (Three.js, AI Hand Tracking)

- Developed advanced, touchless web interfaces for e-commerce and media applications. Leveraged spatial computing and AI hand tracking to eliminate traditional click navigation, pioneering new interactive user experiences and fluid gesture-based micro-interactions.

Nova UPI App | UI/UX Engineer (Interactive Prototyping & Design Systems)

- Architected the complete design system and frontend interface for a fintech application during a 48-hour sprint. Engineered a highly detailed ecosystem of polished micro-interactions, complex layout stacks, and fluid state transitions to maximize transaction speed and user retention.

Achievements

- **National Selection, Smart India Hackathon (2025):** Chosen to work on developing YatraSarathi - An intelligent AI-based train traffic management system with the goal of increasing section capacity of Indian railways.
- **Rapid UI Architecture (Tutedude Hackathon 2025):** Created a complete high fidelity application prototype (Solo Traveler App) including all the user research and micro interactions.
- **Rapid-Sprint Development (GDG IWD & Hack With Vizag 3.0):** Participated in several development sprints with engineering teams for creating AI applications of accessibility and cognitive assessments (MindBridge & CogniScan).

Technical Skills

UI Engineering & Prototyping: Figma, Design Systems, Framer Motion, React Reanimated, Adobe After Effects, Wireframing, Responsive Design

Frontend & Spatial Computing: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, React Native, Three.js

AI/ML Integration: OpenCV, MediaPipe, Scikit-learn, Computer Vision, Gemini API, DeepSeek API

Backend & Architecture: Node.js, Express.js, Python, Flask, Prisma ORM, MongoDB, REST APIs

Developer Tools: Git, GitHub, Postman, VS Code, Unity, Agile
